EDITORIAL
McIntyre, Lauren, M., Data: The foundation of science

PERSPECTIVES
GREEN, M. M., 2010: A century of Drosophila genetics through the prism of the white gene
BERG, PAUL, AND JANET E. MERTZ, Personal reflections on the origins and emergence of recombinant DNA technology

INVESTIGATIONS
Methods, technology, and resources
LIU, SANZHEN, HSIN D. CHEN, IRINA MAKAREVITCH, REBECCA SHIRMER, SCOTT J. EMRICH, CHARLES R. DIETRICH, W. BRAD BARBAZUK, NATHAN M. SPRINGER AND PATRICK S. SCHNABLE, High-throughput genetic mapping of mutants via quantitative single nucleotide polymorphism typing

Genome integrity and transmission
NORTHAM, MATTHEW R., HEATHER A. ROBINSON, OLGA V. KOCHENOVA AND POLINA V. SHICHERBAKOVA, Participation of DNA polymerase ζ in replication of undamaged DNA in Saccharomyces cerevisiae
FEISS, MICHAEL, ERIN REYNOLDS, MORGAN SCHROCK AND JEAN SIPPY, DNA packaging by λ-like bacteriophages: Mutations broadening the packaging specificity of terminase, the λ-packaging enzyme
XU, MIN, HARGEET K. BRAR, SEHIZA GROSIC, REID G. PALMER AND MADAN K. BHATTACHARYYA, Excision of an active CACTA-like transposable element from DFR2 causes variegated flowers in soybean [Glycine max (L.) Merr.]
SUNDARARAJAN, RANGAPRIYA, LIONEL GELLON, RACHEL M. ZUNDER AND CATHERINE H. FREUDENREICH, Double-strand break repair pathways protect against CAG/CTG repeat expansions, contractions and repeat-mediated chromosomal fragility in Saccharomyces cerevisiae
HOPPE, PAMELA E., JOHNNIE CHAU, KELLY A. FLANAGAN, APRIL R. REEDY AND LAWRENCE A. SCHRIEFER, Caenorhabditis elegans unc-82 encodes a serine/threonine kinase important for myosin filament organization in muscle during growth

Gene expression
LIU, YANG, XINJING XU AND MIN-HAO KUO, Snf1p regulates Gcn5p transcriptional activity by antagonizing Spt3p
FINKEL, JONATHAN S., KAREN CHINCHILLA, DORIS URSIC AND MICHAEL R. CULBERTSON, Sen1p performs two genetically separable functions in transcription and processing of U5 small nuclear RNA in Saccharomyces cerevisiae
CIOBANU, DANIEL C., LU LU, KIYOBENI MOZHUI, XUSHENG WANG, MANJUNATHA JAGALUR, JOHN A. MORRIS, WILLIAM L. TAYLOR, KLAUS DIETZ, PERIKLES SIMON AND ROBERT W. WILLIAMS, Detection, validation, and downstream analysis of allelic variation in gene expression

Cellular genetics
CAMPOS, ISABEL, JENNIFER A. GEIGER, ANA CATARINA SANTOS, VANESSA CARLOS AND ANTONIO JACINTO, Genetic screen in Drosophila melanogaster uncovers a novel set of genes required for embryonic epithelial repair

Developmental and behavioral genetics
FAN, YUJIE, MICHAEL SCHRIEFER, ANA CUERVO GASPAR, CATHERINE DREUX, ARLETTE KPEBE, LINDA CHANEY, AURELIE MATHEU, CHRISTOPHE HETTE, OLIVIER GREMY, EMELINE SAROT, MARK HORN, YUNLONG ZHAO, TERRI GOSS KINZY AND LEONARD RABINOW, Drosophila translational elongation factor-1y is modified in response to DOA kinase activity and is essential for cellular viability
HEDIGER, MONIKA, CAROLINE HENGGELER, NICOLE MEIER, REGINA PEREZ, GIUSEPPE SACCONE AND DANIEL BOPP, Molecular characterization of the key switch F provides a basis for understanding the rapid divergence of the sex-determining pathway in the housefly. .......................................................... 155—170

HEKMAT-SCAFE, DARIA S., ADRIANA MERCADO, ADRIEL A. FAJILAN, ANN W. LEE, RICHARD HSU, DAVID B. MOUNT AND MARK A. TANOUYE, Seizure sensitivity is ameliorated by targeted expression of K⁺–Cl⁻ cotransporter function in the mushroom body of the Drosophila brain. .......................................................... 171—183

SALZER, CLAIRE L., YAIR ELIAS AND JUSTIN P. KUMAR, The retinal determination gene eyes absent is regulated by the EGF receptor pathway throughout development in Drosophila. ......................... 185—197

WU, CHRISTINE, AND LAURA A. JOHNSTON, Control of wing size and proportions by Drosophila Myc. .......................................................... 199—211

Population and evolutionary genetics

BLONK, ROBBERT J. W., HANS KOMEN, ANDRIES KAMSTRA AND JOHAN A. M. VAN ARENDONK, Estimating breeding values with molecular relatedness and reconstructed pedigrees in natural mating populations of common sole, Solea Solea. .................................................................................. 213—219

SPRINGMAN, R., T. KELLER, I. J. MOLINEUX AND J. J. BULL, Evolution at a high imposed mutation rate: Adaptation obscures the load in phage T7. .......................................................... 221—232

HODGKINSON, ALAN, AND ADAM EYRE-WALKER, Human triallelic sites: Evidence for a new mutational mechanism? .................................................................................. 233—241

LEUENBERGER, CHRISTOPH, AND DANIEL WEGMANN, Bayesian computation and model selection without likelihoods. .......................................................... 243—252

KINGAN, SARAH B., DANIEL GARRIGAN AND DANIEL L. HARTL, Recurrent selection on the Winters sex-ratio genes in Drosophila simulans. .......................................................... 253—265

Genetics of complex traits

EIZIRIK, EDUARDO, VICTOR A. DAVID, VALERIE BUCKLEY-BEASON, MELODY E. ROELKE, ALEJANDRO A. SCHÄFFER, STEVEN S. HANNAH, KRISTINA NARFSTRÖM, STEPHEN J. O'BRIEN AND MARILYN MENOTTI-RAYMOND, Defining and mapping mammalian coat pattern genes: Multiple genomic regions implicated in domestic cat stripes and spots. .................................................................................. 267—275

VARONA, LUIS, AND DANIEL SORENSEN, A genetic analysis of mortality in pigs. .......................................................... 277—284

Genome and systems biology

RAMADAS, ROHINI, AND MUKUND THATTAI, Flipping DNA to generate and regulate microbial consortia. .......................................................... 285—293

NOTES

Genome integrity and transmission

TITEN, SIMON W. A., AND KENT G. GOLIC, Healing of euchromatic chromosome breaks by efficient de novo telomere addition in Drosophila melanogaster. .......................................................... 309—312

Population and evolutionary genetics

BARRASH, DANIEL A., Genetic testing of the hypothesis that hybrid male lethality results from a failure in dosage compensation. .......................................................... 313—316
