Quickly KOing genes in mice
Centromere evolution and speciation
Epigenetic programming of niche cells
Automated phenotyping
Advance of advantageous alleles
BOARD OF DIRECTORS

R. Scott Hawley, President 2010 (2011)
Stowers Institute for Medical Research

Paul W. Sternberg, Vice President 2010 (2011)
California Institute of Technology

Fred Winston, Past President (2010)
Harvard Medical School

Trudy F. Mackay, Treasurer (2010)
North Carolina State University

Mariana F. Wolfner, Secretary (2013)
Cornell University

Mark Johnston, Journal Editor-in-Chief (2013)
University of Colorado-School of Medicine

Utpal Banerjee (2013)
University of California, Los Angeles

Sally A. Camper (2010)
University of Michigan Medical School

Elizabeth A. De Stasio (2013)
Lawrence University

Jay C. Dunlap (2011)
Dartmouth Medical School

Sue Jinks-Robertson (2013)
Duke University Medical Center

Douglas E. Koshland (2011)
HHMI/Carnegie Institution of Washington

Charles H. Langley (2010)
University of California, Davis

Susan T. Lovett (2010)
Brandeis University

Thomas J. Silhavy (2013)
Princeton University

Susan R. Wessler (2011)
University of Georgia

Sherry A. Marts, ex officio
Executive Director
Genetics Society of America

The Genetics Society of America is organized to provide for association and conference among students of heredity and to encourage close relationships between workers in genetics and those in related sciences. GENETICS is its official journal. All persons interested in genetics are eligible for active membership. Application for membership may be made on the form in this journal or obtainable from the address below.

GENETICS ISSN 0016-6731 is published monthly by the Genetics Society of America, 9650 Rockville Pike, Bethesda, Maryland 20814-3998. For pricing, consortia sales, or a multi-site quotation, please contact Tracey DePellegrin Connelly, Executive Editor, at td2p@andrew.cmu.edu or (412) 268-1812. Copyright © 2010 by the Genetics Society of America.

Correspondence about membership, nonmember subscriptions, and other noneditorial matters should be directed to the appropriate address below, according to whether the inquirer is (or would be) a GSA member or nonmember subscriber.

GSA MEMBERS ONLY:
GSA Administrative Office
9650 Rockville Pike
Bethesda, Maryland 20814-3998
(301) 634-7300

NONMEMBER SUBSCRIPTIONS:
FASEB Subscription Department
9650 Rockville Pike
Bethesda, Maryland 20814-3998
(301) 634-7029

Back issues of GENETICS from 1992 (Volume 130) through 2009 (Volume 183) can be obtained through the nonmember subscriber address above. GENETICS is also available in microform from University Microfilms International, 300 North Zeeb Road, Ann Arbor, MI 48106; European inquiries may be directed to 30-32 Mortimer Street, Dept. PR, London, WIN 7RA, England.

PERMISSION TO PHOTOCOPY: The Genetics Society of America permits unlimited photocopying of any article, without fee, from this or any previous issue of GENETICS for educational purposes or for individual use. Students may incorporate any portion of their research published in GENETICS into a dissertation without further specific permission. These permissions do not extend to copying for other purposes, such as for advertising or promotional purposes, for creating new collective works, or for resale. Please address such requests to GENETICS at permissions-genetics@andrew.cmu.edu.

Produced by Dartmouth Journal Services.

About the Cover
Arsenite is both a common environmental contaminant and a medicine used to treat certain cancers. Pan et al. (pp. 725–734) describe a new target for the compound, the yeast TCP complex. TCP assembles many macromolecular complexes, such as microtubules. Arsenite treatment of yeast causes the misshapen microtubules visualized in the lower image. Cover design by Bang Wong and Janet Icasa.
2010 Membership Application
Genetics Society of America

Select your research organism:
- Bacteria
- Drosophila
- Humans
- Yeast
- Chlamydomonas
- Plants
- Fungal
- Virus
- Zebrafish

Select your meetings of interest:
- C. elegans
- Chlamydomonas
- Drosophila
- Fungal Genetics
- Model Organisms to Human Biology
- Yeast
- Mouse

OPTIONAL ITEMS

- Total payment for discount journal subscriptions (see reverse for discount subscriptions available) $_________
- Total payment for Annual Reviews (see reverse for Annual Reviews available) $_________
- Total payment for Conversations in Genetics (see reverse for description of DVDs) $_________
- Total payment for Perspectives on Genetics (see reverse for description of book) $_________

OPTIONAL CONTRIBUTIONS (Contributions to the Society are tax deductible)

- $25  □ $50  □ $100  □ $200  □ Other $_________
- I prefer to make this donation anonymously

TOTAL REMITTANCE ENCLOSED $_________

Payment may be made via money order; a check drawn on a US bank, in US currency ONLY, and made payable to: Genetics Society of America; MasterCard; VISA; Discover or American Express (AMEX) credit card. Checks drawn on foreign banks cannot be accepted. Persons in countries with currency restrictions may apply to the Administrative Office for assistance.

CREDIT CARD INFORMATION - Please type or print clearly

- Check type of card: □ Visa □ MasterCard □ Discover □ American Express
- Card number ___________________________ C.V.V. # __________
- Name on card ___________________________ Expiration date __________
- Authorized signature ______________________ Date __________

I, the undersigned, wish my membership in GSA to begin January 1, 2010

I will receive all applicable subscriptions beginning January of the calendar year.
(Hwe member applications for 2011 available after September 1, 2010.)
