Figure S4  Comparison of posterior distributions for the migration rates in both directions for the European rabbit data, conditional on the assignment of loci based on Bayes factors (“fixed a”) and integrating over the assignment (“marg. a”).

A) Posterior distributions for migration rate from *O. c. cuniculus* to *O. c. algirus*;

B) Posterior distributions for migration rate from *O. c. algirus* to *O. c. cuniculus*.
