

ZNF259: rs964184

A

B

Figure S20 Haplotype structure and EHH decay around rs964184 near the *APOA1* gene. (A) Haplotype structure around rs964184 in the Ainu and 1KG phase 3 JPT, CHB and CEU populations. Each column represents a variant and each row represents a phased haplotype. Yellow and blue colors represent ancestral and derived alleles, respectively. (B) EHH decay around rs964184. Ainu haplotypes harboring a derived allele at rs964184 show extended LD.
