

A

B

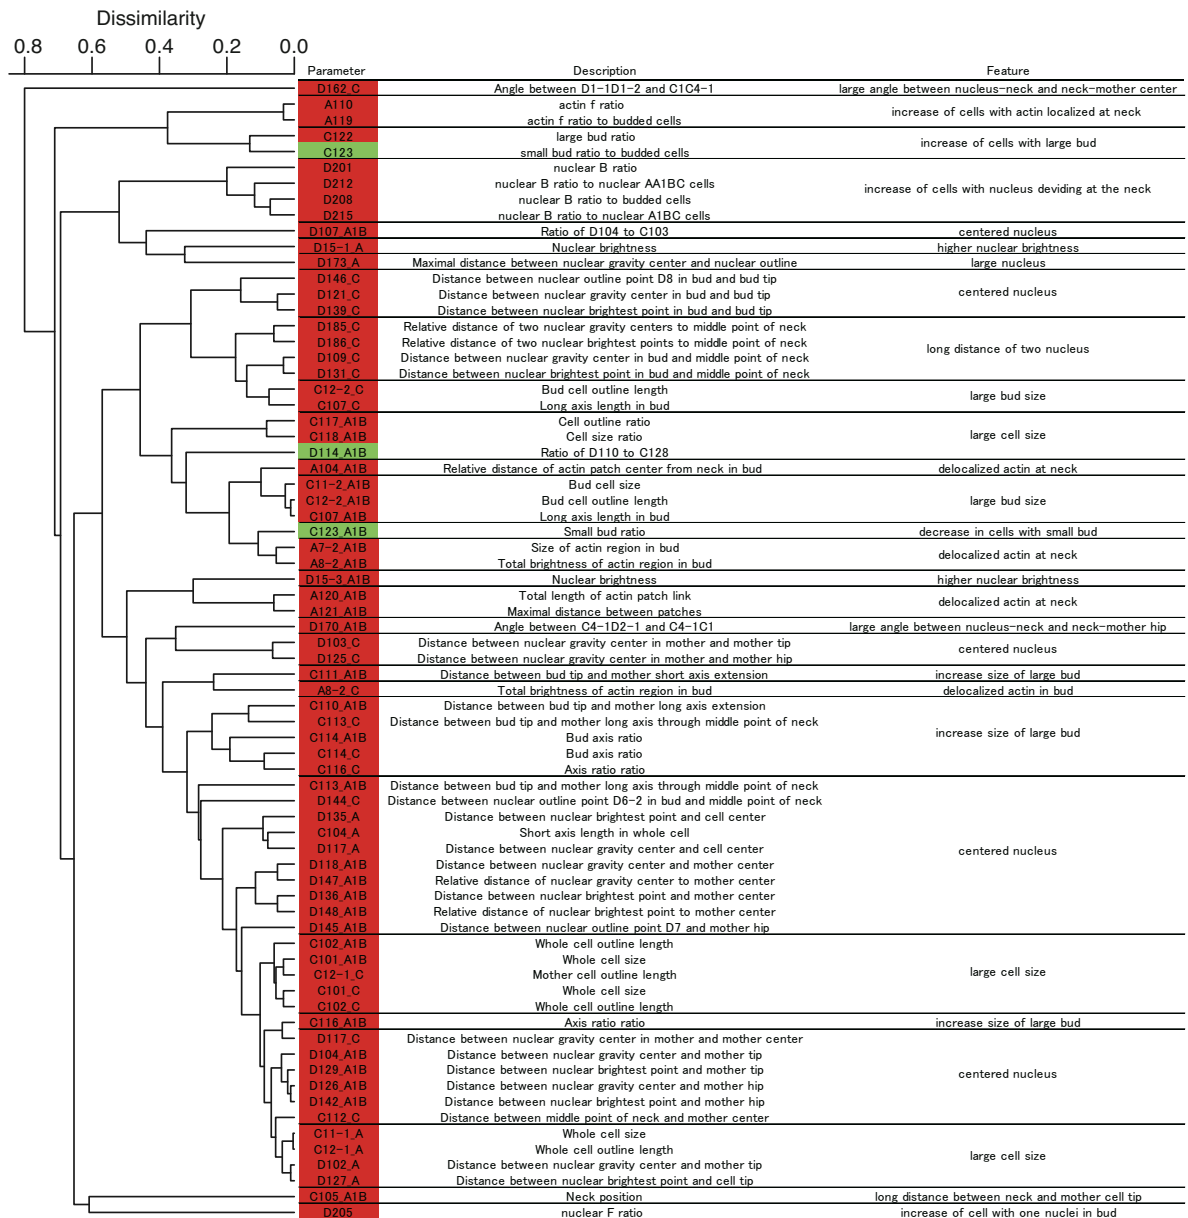

FIGURE S3.—Morphological features of each class. (A)-(C) represent lists of parameters showing characteristic changes in classes I-III, respectively. The red and green colors in the ‘Parameter’ column indicate increases and decreases ( $P < 0.001$ ) in parameter values of *fsI* mutants ( $P < 0.001$ ), respectively. Dissimilarity indicates the value based on the rank-order correlation coefficient (see Materials and Methods, Ohnuki *et al.* 2007).
