FIGURE S3.—Mutations introduced into the full-length 3'UTR of cdh-3. 40 base pairs of the 3'UTR of cdh-3 encompassing the predicted miR-52 target site is shown. Mutations introduced into the 3'UTR should abolish either some (MUT) or all (DEL) base pairing between the miRNA seed and the 3' UTR.

```plaintext
miR-52

3'-UCGUUCUUUGUAUACAUUGCCAC-5'
