Vol. 212 No. 2 June 2019

Drosophila fruitless-expressing neurons (green) in the male internal genitalia, as visualized through the cuticle of the male external genitalia (purple autofluorescence of cuticle). Image courtesy of Devan and Manoli in the laboratory of Bruce Baker. See Andrew *et al.*, pp. 365–376.

THE 2019 GSA HONORS AND AWARDS

- 361–363 **Q & A with Daniel L. Hartl, Recipient of the 2019 Thomas Hunt Morgan Medal**
L. Hartl, Daniel
OPEN ACCESS

PERSPECTIVES

- 365–376 **Sex and the Single Fly: A Perspective on the Career of Bruce S. Baker**
Andrew, Deborah J., Elizabeth H. Chen, Devanand S. Manoli, Lisa C. Ryner,
and Michelle N. Arbeitman

INVESTIGATIONS

METHODS, TECHNOLOGY, AND RESOURCES

- 377–385 ***beditor*: A Computational Workflow for Designing Libraries of Guide RNAs for CRISPR-Mediated Base Editing**
Dandage, Rohan, Philippe C. Després, Nozomu Yachie, and Christian R. Landry
HIGHLIGHTED ARTICLE OPEN ACCESS

- 387–395 **NATF (Native and Tissue-Specific Fluorescence): A Strategy for Bright, Tissue-Specific GFP Labeling of Native Proteins in *Caenorhabditis elegans***
He, Siwei, Andrea Cuentas-Condori, and David M. Miller, III
OPEN ACCESS

STATISTICAL GENETICS AND GENOMICS

- 397–415 **Structured Genome-Wide Association Studies with Bayesian Hierarchical Variable Selection**
Zhao, Yize, Hongtu Zhu, Zhaohua Lu, Rebecca C. Knickmeyer, and Fei Zou
OPEN ACCESS

GENOME INTEGRITY AND TRANSMISSION

- 417–430 **Overlapping Roles in Chromosome Segregation for Heterochromatin Protein 1 (Swi6) and DDK in *Schizosaccharomyces pombe***
Shen, Kuo-Fang and Susan L. Forsburg
- 431–443 **ATM and ATR Influence Meiotic Crossover Formation Through Antagonistic and Overlapping Functions in *Caenorhabditis elegans***
Li, Wei and Judith L. Yanowitz

- 445–460 **DNA Rereplication Is Susceptible to Nucleotide-Level Mutagenesis**
Bui, Duyen T. and Joachim J. Li
HIGHLIGHTED ARTICLE OPEN ACCESS

461–468 Meiotic MCM Proteins Promote and Inhibit Crossovers During Meiotic Recombination
Hartmann, Michaelyn, Kathryn P. Kohl, Jeff Sekelsky, and Talia Hatkevich
OPEN ACCESS

469–487 Instability of the Pseudoautosomal Boundary in House Mice
Morgan, Andrew P., Timothy A. Bell, James J. Crowley,
and Fernando Pardo-Manuel de Villena
HIGHLIGHTED ARTICLE

GENE EXPRESSION

489–508 The Role of Insulators in Transgene Transvection in *Drosophila*
Piwko, Pawel, Ilektra Vitsaki, Ioannis Livadaras, and Christos Delidakis
HIGHLIGHTED ARTICLE

CELLULAR GENETICS

509–522 Kinetochores Recruitment of the Spindle and Kinetochores-Associated (Ska) Complex Is Regulated by Centrosomal PP2A in *Caenorhabditis elegans*
Lange, Karen I., Aly Suleman, and Martin Srayko

DEVELOPMENTAL AND BEHAVIORAL GENETICS

523–535 The Role of Tissue Inhibitors of Metalloproteinases in Organ Development and Regulation of ADAMTS Family Metalloproteinases in *Caenorhabditis elegans*
Kubota, Yukihiko, Kiyoji Nishiwaki, Masahiro Ito, and Asako Sugimoto

537–552 Genetic Variation for Ontogenetic Shifts in Metabolism Underlies Physiological Homeostasis in *Drosophila*
Matoo, Omera B., Cole R. Julick, and Kristi L. Montooth
HIGHLIGHTED ARTICLE OPEN ACCESS

POPULATION AND EVOLUTIONARY GENETICS

553–564 Divergent Allele Advantage Provides a Quantitative Model for Maintaining Alleles with a Wide Range of Intrinsic Merits
Stefan, Thorsten, Louise Matthews, Joaquin M. Prada, Colette Mair, Richard Reeve,
and Michael J. Stear
HIGHLIGHTED ARTICLE OPEN ACCESS

565–575 Proteostasis Environment Shapes Higher-Order Epistasis Operating on Antibiotic Resistance
Guerrero, Rafael F., Samuel V. Scarpino, João V. Rodrigues, Daniel L. Hartl,
and C. Brandon Ogbunugafor
HIGHLIGHTED ARTICLE OPEN ACCESS
