

FIGURE S1.—*zmf3'h1* maps to the *pr1* locus on chromosome 5L. Genetic linkage mapping of *zmf3'h1* SNP marker on chromosome 5 for (Tx501 × NC7A) and (Tx501 × MP708) F₂ populations. The position of *zmf3'h1* is indicated on both maps and corresponds to the *pr1* locus. Cumulative distances given in centimorgans are indicated to the left of the chromosome and marker loci are indicated to the right.
