

Figure S1 Efficient degradation of the distal, non-seed-containing DSB end in post-senescence survivors. **(A)** Diagram of the assay system similar to Fig. 1A. **(B)** The same blot as shown in Fig. 1B was reprobred with a *LYS2* probe. Note the disappearance of the *LYS2* (chr. VII) signal compared to the *lys2-801* signal (chr. II).
