

Figure S1 Survival of *cdc-25.1* RNAi-treated *skpo-1* animal lines on *E. faecalis*. Wild type and *skpo-1* worms were grown on *cdc-25.1* dsRNA expressing *E. coli* HT115 from L1 through L4 larval stage prior to exposure to *E. faecalis* OG1RF. The *skpo-1* worms (GF89, GF90 and GF91) were more susceptible to *E. faecalis* relative to wild type (P -values < 0.0001, 0.0110, and < 0.0001, respectively).
