

FILE S1

Numbers of transfers observed out of 1,000 simulations or each set of parameters. Populations of 1,000 individuals are shown in A and B. Populations of 500 individuals are shown in C and D. Populations of 100 individuals are shown in E and F. Results from nuclear mutation rates of 10^{-3} , and 10^{-4} are shown in A, C, and E. Results from nuclear mutation rates of 10^{-5} and 10^{-6} are shown in B, D, and F.
